

MANAGED SERVICES

Keep your systems
updated, maintained,
and secure.

PRO**STHERE**

A Michody Company

Benefits Include:

- Remote Monitoring
- Proactive Attention
- Easy Budgeting
- Peace of Mind

Managed services are the best approach for small to medium-sized businesses that want to ensure their systems remain functional and secure. Unlike the traditional break/fix model that ignores issues until something stops working, managed services keep your systems updated, maintained, and secure.

To achieve these results, we take the time to understand your systems and what you do. Through remote monitoring, we keep an eye on how things are operating. Often, we identify issues before downtime occurs. This truly is the proactive approach to IT.

With our managed services plan, you can rest easy knowing that your critical systems are operating properly. We can take care of systems such as networks, phone systems, door access control, security cameras, servers, data rooms, and end-user equipment. We become your virtual IT department so you can focus on your business with minimal disruption.

Another great benefit of managed services is predictable cost. Instead of getting hit with a high break/fix rate, managed services provides a lower fixed price for easy budgeting.

Did You Know?

Nearly 46% of businesses say that they can access skillsets they don't have in-house due to outsourcing.

PROSTHERE

is ready to assist your business
with managed services for
all of your IT systems.
